STORY

We believe in the power of storytelling and feel that every story matters. Traditional totem poles were one of the earliest forms of storytelling for Pacific Northwest Tribes as they represented family legends, heritage, and spiritually significant crest animals that reflect the lineage and events. However, totems do not need to be larger than life to create meaning.

Historical relics show totems and crests carved on everyday objects like spoons, hair combs, jewelry, and canes. The objects symbolized community, sharing, beauty, and stability. Choosing common objects ensured the legacy of the totem stories continue through daily interactions.

In today's busy world, it is easy to lose touch to our history and stories and many struggle to set clear goals, create a vision of their lives, or define their personality.

Identifying a totem animal can help individuals connect to a story and rediscover their roles in this world in a meaningful way.

Discover Your Totem

Sometimes it's hard to put words to our feelings, and a totem can be a powerful way to share your story without needing to speak. Wearing a totem can give you the words in your heart, reminding you of your strengths, nature, and place in life.

If totems are a new concept for you, take our interactive quiz online by following www.mytotemtribe.com. After a brief interactive Likert-scale personality test, your totem will be revealed.

Little Business Men

Our Humble Beginnings

Spirit animals have always been an interest for our family. Through their totem identity, our children learned to value one another's difference, take pride in their strengths, and also see areas in their lives that would require hard work to find a balance.

A few years ago, our three boys began selling handmade totem animal necklaces at the Saturday Market. The jewelry creation process also served as a way to connect with their Native American culture and study art techniques. People loved the jewelry and our boys enjoyed fattening their wallets, but we had not anticipated the reality that few of our customers were in touch with their identities. While totems were a new concept for most people, that didn't stop them from wanting to learn more about themselves. We developed a simple set of questions to help customers find a totem, and seeing their faces light up after we revealed a potential totem match was so fun!

When Summer was over, we weren't ready to let go of the fun of totem jewelry. We wanted EVERYONE to dig deeper into their identity and discover their potential and felt that totems could be an important part of self-discovery. We had the idea of creating these unique stackable totem beads and spent the next 2 years working on our vision.

MY TOTEM TRIBE

My Totem Tribe is a Native American and woman owned business. Our children are not only the inspiration to the business, but they help make key decisions about the look of each jewelry piece often adding details to the final designs. While it took nearly 2 years to launch, we are excited to bring totem jewelry - and hope your totem can help shape your story.
